EXPERIENCE

Karat

Colombia, Barranquilla

Software Engineer

06/2023 - Present

- Engineered and led development of a redesigned candidate invitation workflow, including a complex time-zone-aware scheduling calendar built with React.
- Improved user experience by reducing average page loading times from 2 seconds to 300ms.
- Spearheaded the migration of a core Ruby on Rails service from Webpacker to Vite, improving developer productivity with hot reloading.
- Collaborate closely with design and product teams to refine features, promote best practices through code reviews, and maintain comprehensive testing.
- Technologies & Tools: React.js, Ruby on Rails, TypeScript, Zustand, AWS, GitHub Actions, Docker, SQL.

Leanware

Barranquilla

Full Stack Developer

02/2023 - 06/2024

- Spearheaded development of a B2B project while working directly with the client and serving as the only developer for over a year.
- Maintained strong UX and stability through agile iteration, trunk-based repository management, and monorepo practices for small teams.
- Promoted engineering best practices and quality technology adoption through technical talks.
- Managed client expectations and project deadlines while producing well-tested code.
- Technologies & Tools: React.js, Django, TypeScript, React Router, GCP, GitHub, GitHub Actions, Docker, Python.

Alignable

Barranquilla

Software Engineer

05/2022 - 11/2022

- Improved robustness and performance of website chat functionality with backend and frontend changes.
- Worked with the team on a questionnaire that improved the social network's matchmaking capabilities.
- Integrated an existing email contact import feature with the questionnaire to improve user experience and provide more data for matchmaking.
- Became a subject-matter expert on core features and helped the team work effectively with those areas.
- Technologies & Tools: Ruby on Rails, React.js, TypeScript, BEM, Redis, RSpec, Redux.

Leanware

Barranquilla

Full Stack Developer

04/2021 - 05/2021

- Designed and developed UIs in Angular and React.js with an emphasis on UX.
- Architected serverless microservices and optimized performance for data- and resource-intensive APIs on AWS.
- Helped build robust B2B and SaaS products with strong user experiences.
- Went beyond customer requirements to identify edge cases and potential bugs early in development.
- Led a SaaS project as the company's first full-stack developer.
- Technologies & Tools: Angular, React.js, AWS, Django, Node.js, GCP.

Freelancer

Web Developer

06/2020 - 03/2021

- Developed WordPress websites and ecommerce stores based on client requirements.
- Provided support and built new services for companies updating existing software solutions.
- Worked with clients to build MVPs and test business ideas using agile methodologies.
- Helped small businesses and entrepreneurs grow with quality software while keeping development within limited budgets.
- Technologies & Tools: WordPress, WooCommerce, Strapi, Python, Flask, Angular, Shopify.

City Lending Inc

Web Developer

Barranquilla

10/2019 - 05/2020

- Developed multiple microservices focused on improving integration and communication between internal dependencies.
- Built frontends for services so employees could access data in real time.
- Worked with the marketing team to find new ways to reach customers during the COVID pandemic.
- Helped managers oversee operations and make decisions based on data.
- Technologies & Tools: Python, Node.js, Angular, AWS, PHP, Ruby on Rails.

Biggssoft

Full Stack Developer

Barranquilla

07/2018 - 09/2019

- Developed a WordPress ecommerce site and worked heavily with CSS to create polished interfaces and animations.
- Maintained a Ruby on Rails internal tool focused on data and forms.
- Helped replace manual paperwork with internal software workflows.
- Technologies & Tools: WordPress, CSS, Ruby on Rails, Angular, jQuery.

EDUCATION

Universidad del Norte

Computer Science

Barranquilla, Atlantico

11/2021

- Capstone Project: Developed an application prototype aimed at helping teachers use Universal Design for Learning.
