Johnny Villegas

Backend Engineer @ Quantum Lending Solutions | Python + AWS +
MySQL | Building financial services for fueling Enterprises and SMBs
Colombia

Extracto

Results-driven Backend Engineer with over 6 years of experience designing and scaling backend systems across Fintech and SaaS industries. Specialized in Python (FastAPI, Flask, Django), with strong proficiency in Node.js, PHP, and modern development practices.

Proven ability to build high-performance APIs, automate infrastructure with AWS, and manage deployment pipelines using CI/CD tools like GitHub Actions and Terraform. Hands-on experience with both relational and NoSQL databases, containerization (Docker), and Infrastructure as Code (IaC) practices.

Passionate about writing clean, maintainable code and continuously improving systems for reliability and scalability. Strong collaborator and fast learner who thrives in agile environments and loves turning complex requirements into elegant solutions.

Experiencia

Quantum Lending Solutions

Software Engineer

febrero de 2024 - Present (2 años 4 meses)

Reston, Virginia, United States

Member of the Platform team as Senior Software Engineer:

- Designing and developing financial core services (Using Python, AWS, Django-Ninja, FastAPI).
- Doing Code review to enforce best practices and Design patterns.
- Implementing Unit and Integration tests when integrating new code (Using Pytest, Moto).
- Designed, developed a KYC-Fraud detection microservice based on Socure API and integrated to Salesforce (Using Python, AWS, Salesforce, AWS DynamoDB).

- Developed a Payment processor microservice using Plaid API and integrated it to legacy Back Office system to reduce overdue portfolio. (Using Python, Plaid API, Cryptography, AWS, AWS Lambda, AWS CDK, AWS API Gateway, Django, Docker)
- Designing and developing libraries of our in-house Python framework for fast-paced backend development.
- Implementing and migrating services to our Event-driven architecture (Using RabbitMQ, Redis, Kubernetes, AWS SQS, AWS SNS)
- Implemented Salesforce data ingestion flows using AWS Appflow.

Camino Financial

Software Engineer

febrero de 2023 - febrero de 2024 (1 año 1 mes)

Los Angeles, California, United States

Member of the Engineering team as Senior Software Engineer:

- Maintained legacy Backoffice backend written in Django by solving reported bugs and adding new features from Credit team.
- Designed and Implemented the new Event-Driven Architecture (Using AWS EventBridge, AWS CDK).
- Designed and developed financial core microservices (Using Python, AWS).
- Executed Code review to enforce best practices and Design patterns.
- Implemented Unit and Integration tests when integrating new code (Using Pytest, Moto).
- Increased microservices monitoring and observability (Using AWS Powertools).
- Designed and implemented a backend system that generates marketing campaigns links from processed CSV files with integrations to Plaid and Salesforce (Using Python, AWS Lambda, AWS S3, AWS DynamoDB, AWS Step Functions, AWS EventBridge).

Globant

Software Engineer

mayo de 2022 - enero de 2023 (9 meses)

Barranquilla, Atlántico, Colombia

Member of the Globant Augmented Staffing team as Software Engineer:

- Worked with Python + FastAPI + AWS + MLOps in the development of microservices and Explainable AI.
- Maintained MLOps workflows and ETL processes.

Leanware

Software Engineer

agosto de 2021 - abril de 2022 (9 meses)

Barranquilla, Atlántico, Colombia

- Designed and implemented a PDF template filling web application that processes a CSV file to obtain the input data. Tech stack: Node.js + GCP.
- Worked with Python + Flask + AWS + Serverless in a web file hosting for sensitive customers files with high encryption policies.
- Worked with Node.js + Express.js + GCP in a light-weight web accounting software.
- Designed and implemented a near-time trading bot with custom trading strategies. Business services integrations used for data processing and orders placement were Polygon API, InteractiveBrokers API and TradingView webhook for trading signals. Tech stack: Python + AWS + Serverless.

ISWE GROUP

Software Engineer

junio de 2020 - abril de 2022 (1 año 11 meses)

Buenos Aires Province, Argentina

- Worked with Python + Selenium + RQ in a web scrapper for automate FDA Priority Notice webform filling.
- Worked with Python + Flask + Vue.js + PostgreSQL in a vehicle broker prototype by integrating Argentinian SOAP insurances services.
- Designed and implemented an inventory management system integrated with Shopify API for product checking and orders fulfillment. Orders couriers ship labels generated by integrating FedEx, DHL, and UPS Restful APIs. Tech stack: Python + Flask + Vue.js + MongoDB.
- Designed and implemented a mayor update of the inventory management system. This update adds a functionality of the creation and management of clusters of Shopify stores.

City Lending Inc

Back End Developer

octubre de 2019 - mayo de 2020 (8 meses)

Barranquilla, Atlántico, Colombia

- Worked with Python + AWS + Serverless + Encompass API in workflows automation for financial team.
- Worked with Python + PHP + AWS + Serverless in web applications and Restful APIs integrations using Encompass API.
- Designed and implemented a custom chat Salesforce's lightning component and integrating it with Twilio API. Implemented webhooks, triggers for leads

data sanitization, custom loan officers assignation and dashboards for data visualization. Tech stack: Java + Node.js + AWS + Serverless.

Educación

Universidad del Norte

Bachelor of Engineering - BE, Ciencias de la computación · (enero de 2016 - febrero de 2021)
